## **DOE Selects Four Companies for Waste Treatment Contracts**

**Cincinnati--** The Department of Energy (DOE) awarded four separate Indefinite Delivery/Indefinite Quantity (ID/IQ) multiple award contracts today for the treatment of Class A, B and C, Low-Level and Mixed Low-Level Radioactive and Hazardous Wastes. The four companies will be awarded task orders to deal with the various waste types across DOE's Office of Environmental Management cleanup projects.

The four companies included in the multiple award ID/IQ are:

- EnergySolutions, LLC, Salt Lake City, Utah and Oak Ridge, Tennessee
- Perma-Fix Environmental Services, Inc., Oak Ridge, Tennessee
- Philo-Technics, Ltd., Oak Ridge, Tennessee
- Studsvik, Inc., Atlanta, Georgia

The contracts have a maximum value of \$24.9 million with five-year ordering periods.

Over the years, DOE has generated large quantities of the equivalent of Class A, B and C, low-level waste and mixed low-level waste during operations and remediation of facilities and laboratories. The Indefinite Delivery/ Indefinite Quantity contracts will provide a complex-wide contract vehicle for DOE and its Prime Contractors that is efficient, competitively bid, that also encourages innovation and new technologies.
